

Brake: leakage shrinks with n;
J-Lens of real h is estimate/million, not huge

(b) Real last-token h: estimate / million on both

above-good		below-good		v_leak (not h)	
estimate	10.0	estimate	10.2	庞大	10.7
estimated	9.7	estimated	9.9	亿元以上	10.6
million	9.4	Estimate	9.5	万以上	10.4
Estimate	9.3	Estimates	9.4	huge	10.1
Estimates	9.2	estimates	9.4	HUGE	10.1
Based	9.2	Based	9.3	庞大的	9.7
estimates	9.1	million	9.2	enormous	9.6
estimating	8.9	estimating	9.0	超大	9.4

Hypothesis failed: no huge / enormous / 庞大 on h. $\cos(h_{\text{above}}, h_{\text{below}}) = 0$.
v_leak column is a footnote: 庞大 / huge / enormous is on the difference vector $(\mu_{\text{above}} - \mu_{\text{below}})$, not on h.
